Feedback Form (Optional)

Scientific & Technical Information

The search results generated for your recent request are attached. If you have any questions or comments (compliments or complaints) about the scope or the results of the search, please contact *the BioTech searcher* who conducted the search *or* contact:

Mary Hale, Supervisor, 30
CM-1 Room 1E01

Voluntary Results Feedback Form

- *I am an examiner in Workgroup:* (Example: 1610)
- *Relevant prior art found, search results used as follows:*
 - ☐ 102 rejection
 - ☐ 103 rejection
 - ☐ Cited as being of interest.
 - ☐ Helped examiner better understand the invention.
 - ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)
- *Relevant prior art not found:*
 - ☐ Results verified the lack of relevant prior art (helped determine patentability).
 - ☐ Search results were not useful in determining patentability or understanding the invention.

Other Comments:

Drop off completed forms at the Circulation Desk CM-1, or send to Mary Hale, CM1-1E01 or mary.hale@uspto.gov

Pending Nucleic Acid and/or Pending Amino Acid database searches now generate two sets of results. These databases were split into to two parts to reduce the time needed to update the databases daily. The split freed up more machine time for processing searches.

Searches run against the Nucleic Acid Pending database produce two sets of results, with the extensions, **.rpm** and **.rpm**

Searches run against the Amino Acid Pending database produce two sets of results, with the extensions, **.rapm** and **.rapm**

The Pending database search results should not be left in the case because they contain data that is confidential.
